Cardiology Forums**

**CHRONIC
CORONARY SYNDROME**

1st Session

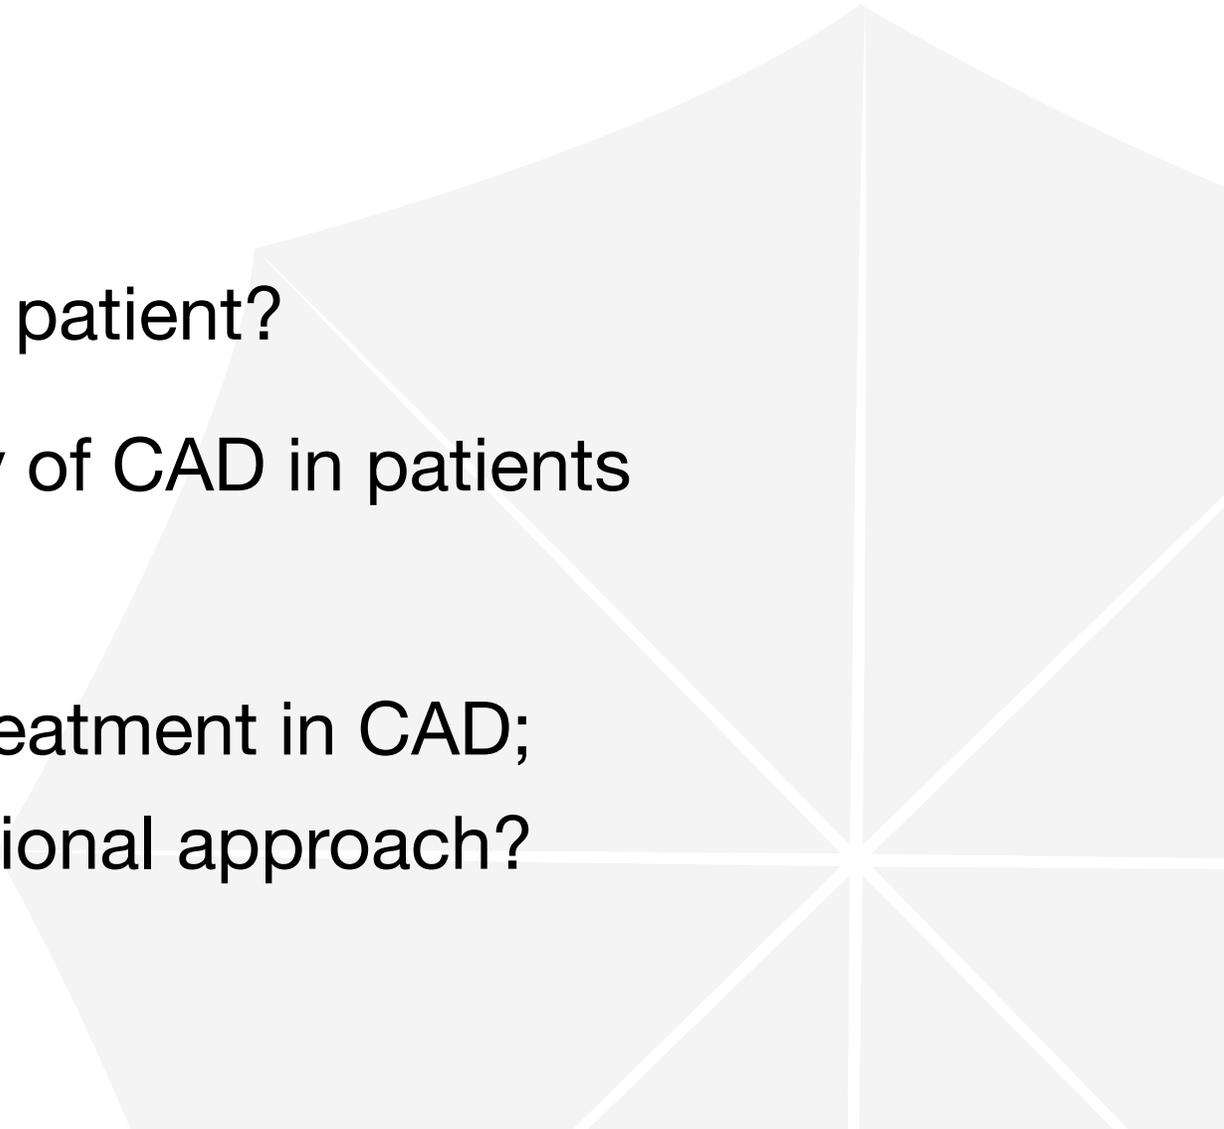

**Proper use of non-invasive tests
for the diagnosis of
chronic coronary syndrome**

LEARNING OBJECTIVES

Proper use of non-invasive tests for the diagnosis of chronic coronary syndrome

LEARNING OBJECTIVES

- Who is categorized as a CCS patient?
 - How to assess the probability of CAD in patients with suspected CAD?
 - How to choose the optimal treatment in CAD; anatomical approach or functional approach?
- 

Proper use of non-invasive tests for the diagnosis of chronic coronary syndrome

LEARNING OBJECTIVES

- How to choose the proper imaging test in a proper time for a selected patient with suspected CAD?
- What is the role of exercise ECG?
- Which CCS patients must undergo invasive coronary angiography directly?
- Which test to choose for patients with a prior revascularization?
