

UMBRELLA

**Focused
Cardiology Forums**

**CHRONIC
CORONARY SYNDROME**

3rd Session

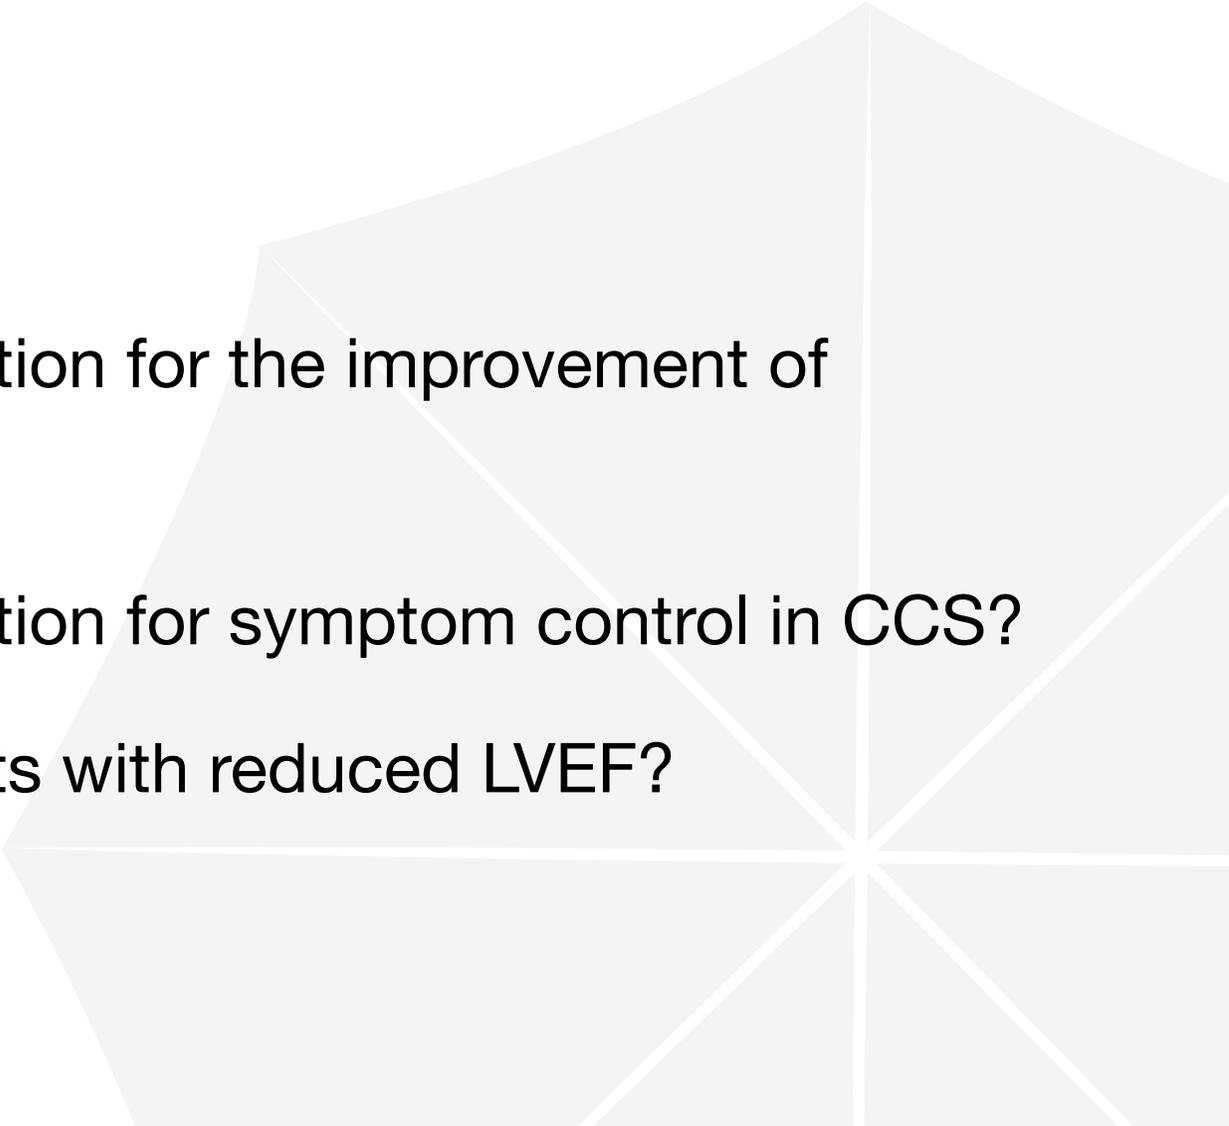

**How to sensibly choose the
invasive strategies in
chronic coronary syndrome**

LEARNING OBJECTIVES

How to sensibly choose the invasive strategies in chronic coronary syndrome

LEARNING OBJECTIVES

- When to consider revascularization for the improvement of outcomes in CCS?
 - When to consider revascularization for symptom control in CCS?
 - When to consider PCI in patients with reduced LVEF?
- 

How to sensibly choose the invasive strategies in chronic coronary syndrome

LEARNING OBJECTIVES

- What to do with significant lesions without correlated ischemia in the imaging tests?
- What to do with significant lesions found in angiography without prior reported ischemia in the imaging tests?
- When to perform FFR in the CCS setting?
- How to choose between PCI and CABG in CCS patients?
